City of Scotts Valley
701 Lundy Lane
Scotts Valley, CA 95066
(831) 438-5854

Budget: $1.3 million

Mesiti-Miller Engineering headed a team of multidisciplinary professionals in the widening and reconstruction of the intersection of Glenwood Drive, Scotts Valley Drive and the State Route 17 on and off-ramps in Scotts Valley.

The project was designed to improve and optimize operations at the intersection to increase capacity and improve safety. Operational deficiencies at the intersection and resulting inefficiencies in signal timing were causing traffic to back up into the intersection of Scotts Valley Drive/Granite Creek Road posing safety hazards to motorists, bicyclists, and pedestrians.

The project was reviewed and permitted by Caltrans as much of the project lies within State of California right-of-way.
Now that the project has been completed, traffic flow and pedestrian safety has been greatly improved. The City and all users are delighted with the results.
