Garrett Roffe, P.E.
MME Engineering
224 Walnut Ave Suite B
Santa Cruz CA, 95062

Dear Garrett,

Thank you so much for visiting our Engineering as a Profession class this summer. Sharing your engineering experiences was immensely valuable for the students. There are so many things about the engineering profession that are best understood in context to their application. Your willingness to take time to talk to students and help them understand the variety of engineering work and the unseen detail and thought that goes into something like our new bike & pedestrian bridge was most helpful. Through your presentation students got an inspiring glimpse of the exciting possibilities that await them as engineers.

Some comments follow:

Garrett, your presentation meant a lot to me and was really interesting! I really respect what you do, and wish you & your wife the best of luck. Cheers. Megan Tang

Thank you all so much for coming and talking to us today! I really appreciate the projects and shared. Because of this class and getting to hear about your work I know I really do want to be an engineer now! Thank you again! --Gray Jameson

Thank you all for taking time out of your days to share with us your experience and insight into the diverse world of engineering. Really appreciative - Geoff A

Glad to know that your Cabrillo education has taken you all so far!-Jimmy G.

Thank you for coming and talking to us all about engineering. It was very insightful and I learned a lot. It's given me a lot more to consider about becoming an engineer. I got to look into the daily life of an engineer and also seeing how fulfilling the career can be. Thanks! - Mikey

Thank y'all for taking time out of your day and helping us have a better understanding of the engineering profession and especially the opportunities all around us. Your talks were awesome Thank you so much! ~ Dominic B.

Really appreciate y'all coming through and taking the time out of your days to come speak about engineering. Favorite part of the class, thank you! _Wiley

Thank You so much for taking time to present us with an in depth view of some of the wonderful joys of engineering. I really appreciate all of your presentations and interesting perspectives on what it's like to be an engineer. Thanks! - Julian Sanchez

Thank you so much for taking time from your busy schedule to share what you guys have experienced. This insight will help most of us decide what interests us the most and I find that vary valuable. I hope to one day find my place in engineering. Thank you! -Pavlova Orozco Corona

Thank you again for your time and willingness to share your experiences and engineering expertise!
Most Gratefully,

Kate Byrne *Dan de Jester*
