Budget: \$33.5 million

Mesiti-Miller Engineering provided civil engineering services in support of the renovation and modernization of four junior high schools in the Cupertino Union School District.

MME provided analysis, design engineering, value engineering, construction plans, technical specifications and construction phase services for a scope of work including bus turnouts and passenger loading areas, parking lot expansions to accommodate 137 cars, advanced storm drain system upgrades, an extensive network of ADA compliant walkways and sidewalks and improved or new playing courts and turf areas.
