

## The Stevens Creek Corridor Park and Restoration, Phase 2

This project represents completion of a critical link in the City of Cupertino's multi-use trail system linking McClellan Ranch and the transportation hub of Stevens Creek Boulevard.

The final trail design took into consideration the wishes of a wide range of community groups while providing latitude to improve the historic Stockmeir Ranch site, consistent with the goal to create a legacy farm; restoring a degraded reach of Stevens Creek; and providing an accessible trailhead with bus drop-off capacity for school groups and other users.
